I personally agree that fries should be banned.

Firstly fries are no good for digestive system. They are also really unhealthy, addictive and you will ~~not~~ be in fit.

In 2007 the rates of ~~mass~~ men that had obesity were 63% for men and 48% for the women. That shows that most men and half of the women in Australia were over weight. That's why they should be banned.

Secondly fries should be banned because men and women have had diabetes from eating fries.

In 2011 nearly about 26 million got diabetes from eating fries. So that means 26 million men and women ~~are~~ were over weight and ~~to~~ fat just from eating fries. Did you know that there is 453 grams in just one large fries. So that

~~Lastly~~ means that if you have ~~two~~ large chips you put on 1 hole kilo.

Now for my last statement I think fries should be banned because they use palm oil. Palm oil comes from palm trees and orangutans live on palm trees. So it means that when we cut the trees down it means that the orangutans have no homes so that is why we have ~~so much~~ ~~orangutans~~ ~~in~~ ~~the~~ ~~world~~

SHOULD FAST FOOD OUTLETS NEED FRIES?

I ^{strongly} believe that ^{fast food outlets} fries shouldn't ^{ban} fries, because everyone eats burgers with fries, vegetarians can't be able to eat the burgers and ^{sometimes} ~~when~~ people ~~are~~ upset ~~eating fries helps people feel better.~~
potato farmer might lose their jobs.

Firstly, ~~eve~~ nearly everyone here goes to McDonalds right? So in every order you must have ordered ~~to~~ fries, right? So it is kind of a custom. Without fries, it is like rewriting history. Did you know that about four trillion ~~to~~ fries are served in McDonalds! ~~So~~ it is really popular.

Secondly, imagine ~~e~~ being a vegetarian. You can't eat the meat in the burgers. ~~No~~ The only thing you can eat is fries. Now fries ~~are~~ the outlets ban the fries. What can you eat at McDonalds? As I am a vegetarian, I know that the ~~only thing~~ there isn't really much to eat.

Thirdly, ~~if~~ what do you need to make fries? Potato. Where do you get potatoes? From farms. Now the farmer work really hard to grow potatoes so if no one ~~will~~ buy it, the farmers ~~with~~ will run out of ^{is going to} business. How would you feel if you were the farmers.

In conclusion, I believe that fast food outlets shouldn't ban fries because it is really popular.
